

Pre-Flight Jitters? Here Are Flight Safety Facts To Help You Relax

Everybody Is Doing It!

Flights have been increasing at an incredible yearly rate. The only dip came due to Covid-19 in 2020, which canceled many flights due to countries shutting down travel. The year 2021 looks promising as safe flights are again increasing at a normal rate!

FLIGHTS PERFORMED FROM 2017-2021 (IN MILLIONS)

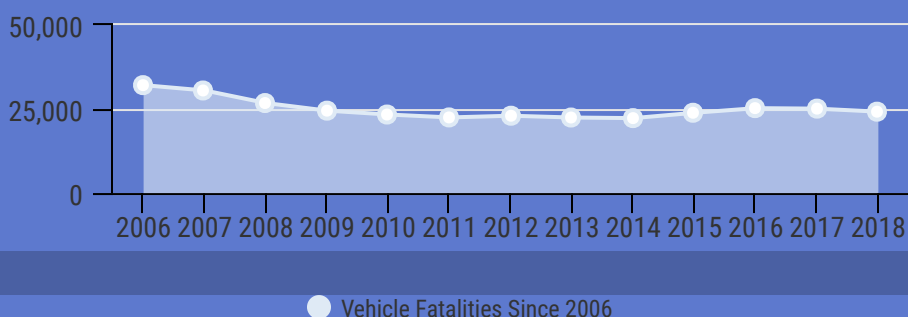

Flights Produce More Fatalities Than Other Travel... False

Since 2006, Air Fatalities have not exceeded 1000. Additionally, fatality count includes deaths that occur when passengers are boarding the flight. Which means... NOT ALL FATALITIES ARE CRASH RELATED!!!!

Now Lets Compare Vehicle Crash Fatalities

Since 2006, Vehicle Crash Fatalities have totaled 326,174. Compared to 7,396 Air Fatalities. From these summary stats alone it is clear Airline Travel is incredibly safer!

Pilot Fact: Certified Safe Service

Pilot Certification takes around 2-4 years. During those years, each pilot is required to have over 1,500 flight hours before being allowed to fly for commercial airline services. It is safe to say they know what they are doing.

We Care About Our People

Our team understands it can be very scary going up into the sky to arrive at your next destination. We dedicate our time to making sure you are comfortable during every aspect of your flight. Take Our Hand, and Let's Fly Together!
